Zero-crash AI & CRM pipelines that never choke on malformed JSON or duplicate webhooks

Production Workflow Topology (n8n Self-Hosted / Cloud & Make.com)

Execution #18,492 — 200 OK (612 ms)

01 / Trigger
Webhook + HMAC
Validates signature header & normalizes raw payload.

02 / Code Node
SHA-256 Dedup
Idempotency lookup stops retry duplicate records.

03 / OpenAI API
Strict JSON Schema
Enforces 100% typed fields; zero markdown fences.

04 / Router
CRM Upsert Sync
Routes qualified leads to HubSpot, Sheets & Notion.

05 / Fallback
Error Alert Queue
Auto-retries 429s & posts dead-letter Slack alerts.

```
"response_format": {
  "type": "json_schema",
  "json_schema": {
    "name": "lead_qualification_v2", "strict": true,
    "schema": { "required": ["intent_tier", "company_domain", "routing_owner"] }
  }
}
```

Why standard AI workflows fail: prompt-only JSON breaks 4–8% of runs. Enforcing strict schema contracts + idempotency guards guarantees clean downstream CRM writes.

99.98%	0	24/7
Schema validity	Duplicate leads	Auto-recovery

Turnkey Handover Standard

What arrives in your Fiverr delivery box

- **Clean Importable Workflow (.json):** One-click import into your n8n or Make.com workspace with clean node naming and sticky-note annotations.
- **Custom JS / Python Code Nodes:** Handles complex array transforms, OAuth2 token refresh, HMAC signatures, and cursor pagination.
- **Error-Trigger Safety Net:** Dedicated fallback branch that logs failed payloads to Google Sheets/Supabase and alerts your team channel.
- **Optional Docker VPS Setup (+Extra):** Production `docker-compose.yml` with PostgreSQL, reverse-proxy SSL, and persistent backups.

Supports HubSpot, Pipedrive, Airtable, Supabase, Shopify, Stripe, Notion & Slack

Transparent Tier Architecture

Choose the right scope for your automation

Basic — Starter Workflow or Bug Fix — **$20**
3-to-5 node n8n/Make scenario, webhook setup, or broken JSON/auth fix (1 Day).

Standard — Multi-Step AI + CRM Pipeline — **$65**
End-to-end n8n/Make flow with OpenAI structured JSON, router & CRM sync (2 Days).

Premium — Enterprise AI Agent System — **$145**
Multi-workflow architecture, custom code nodes, vector/DB memory & retries (4 Days).
